

How to install the LaMa apk:

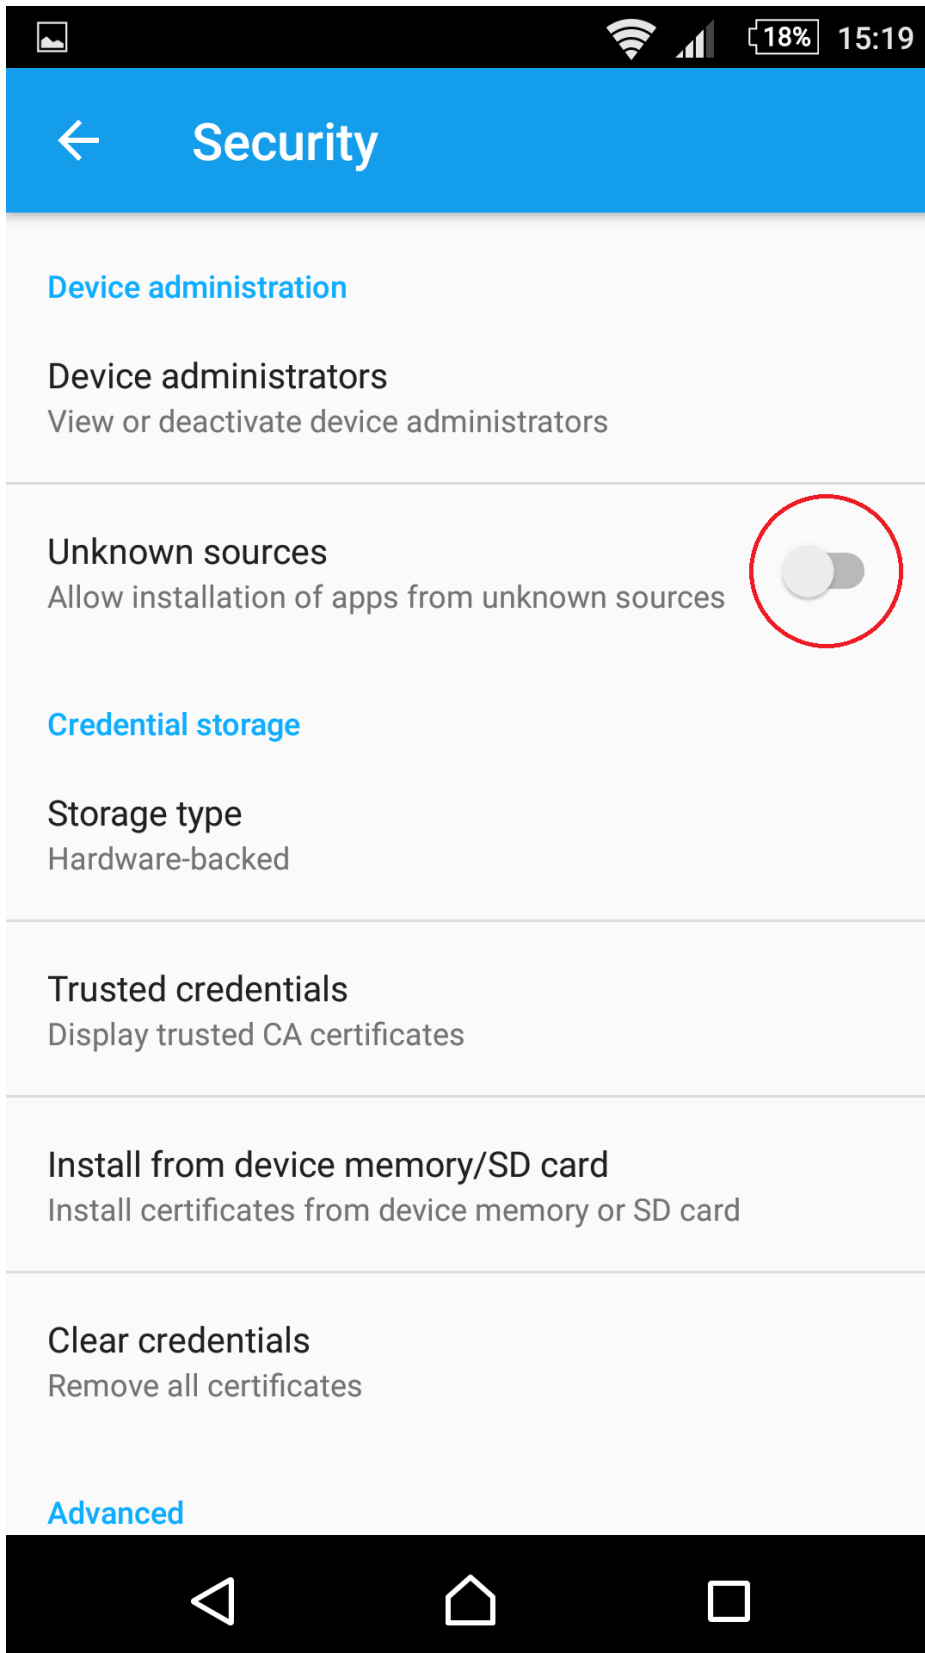

1. Go to the settings of your Android device:

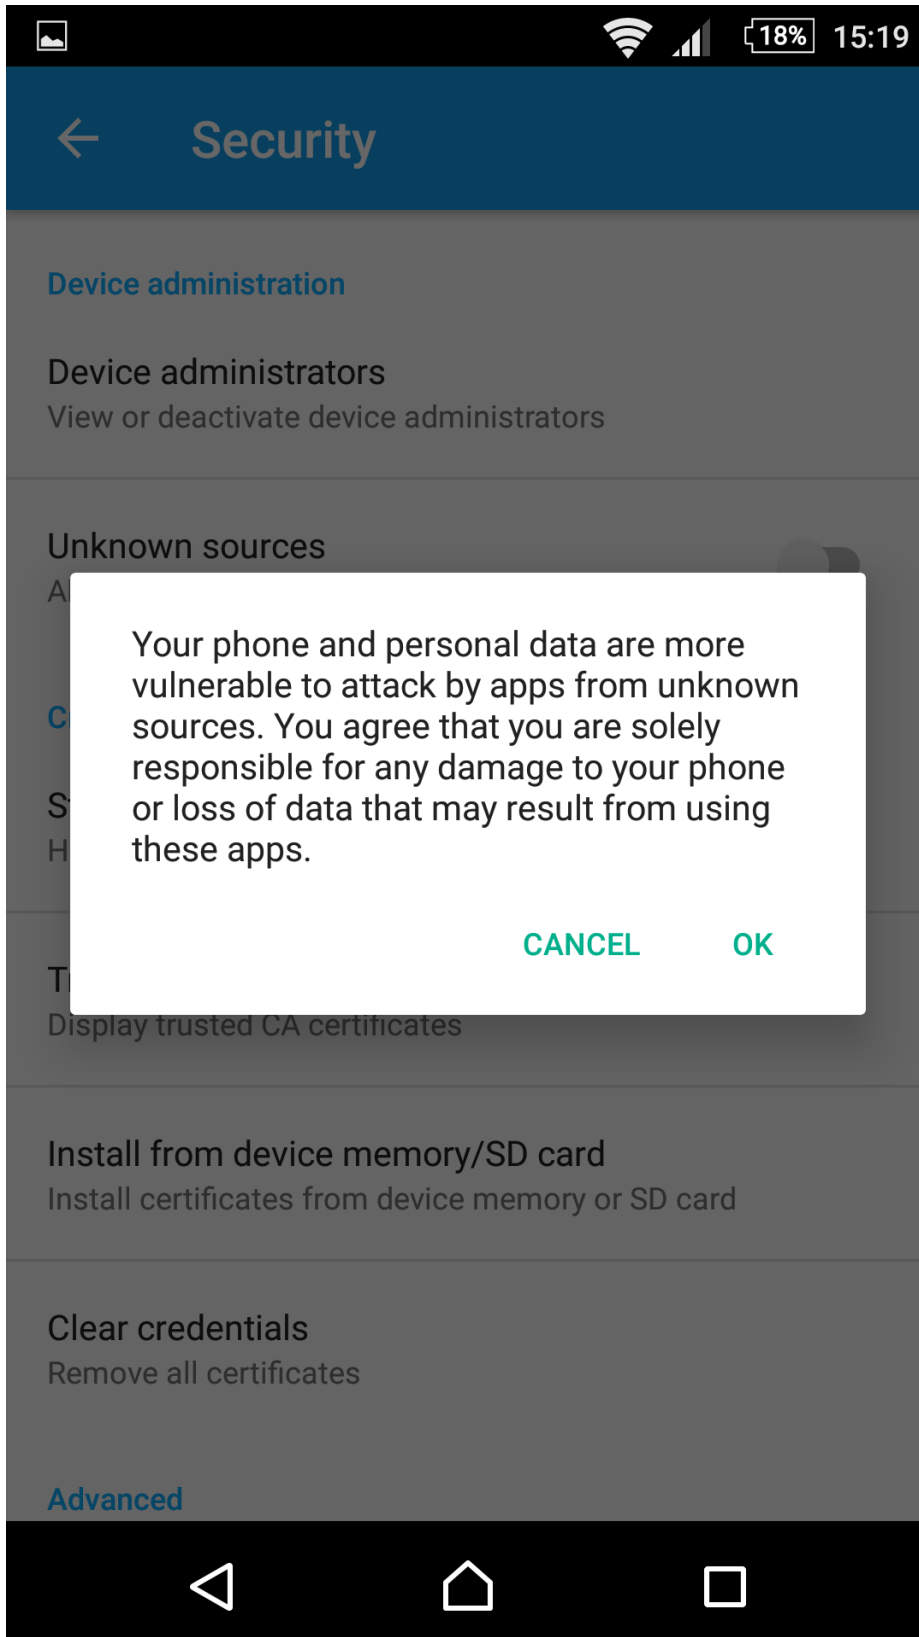

2. Under the “Personal” section select the option “Security”

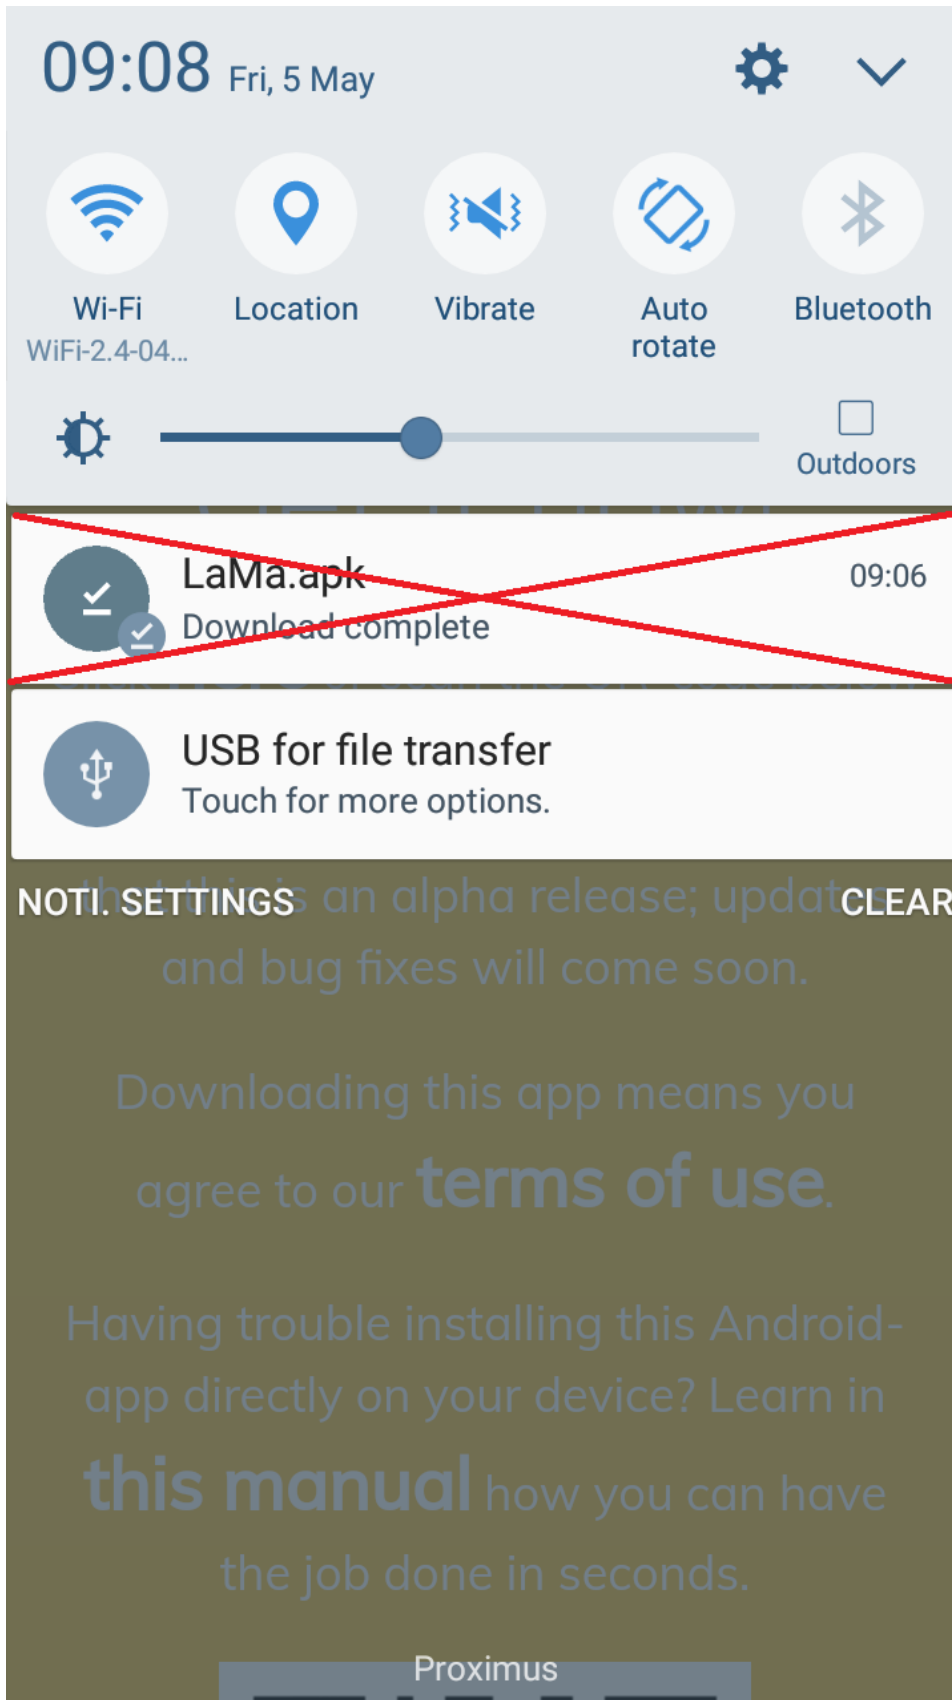

3. Under the "Device Administration" section make sure "Unknown sources" is enabled

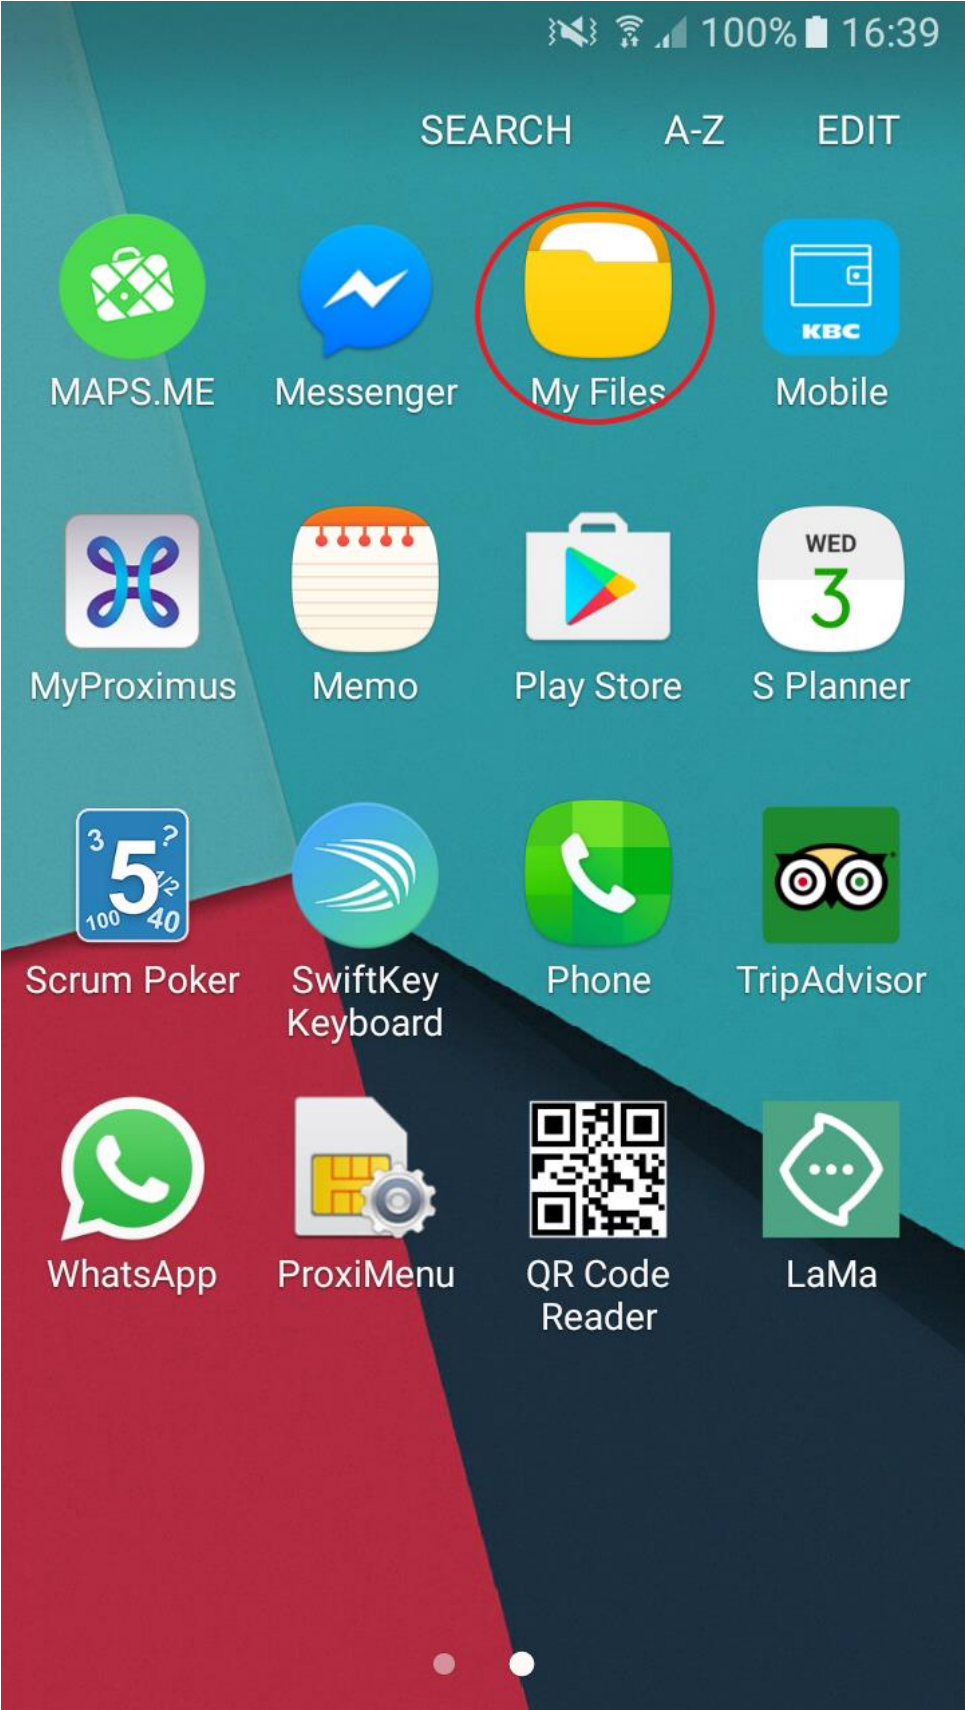

4. This will give a message, press ok to continue. Now the device will be able to install the apk.

5. After downloading do not click on the file here:

6. Instead go to your file manager:

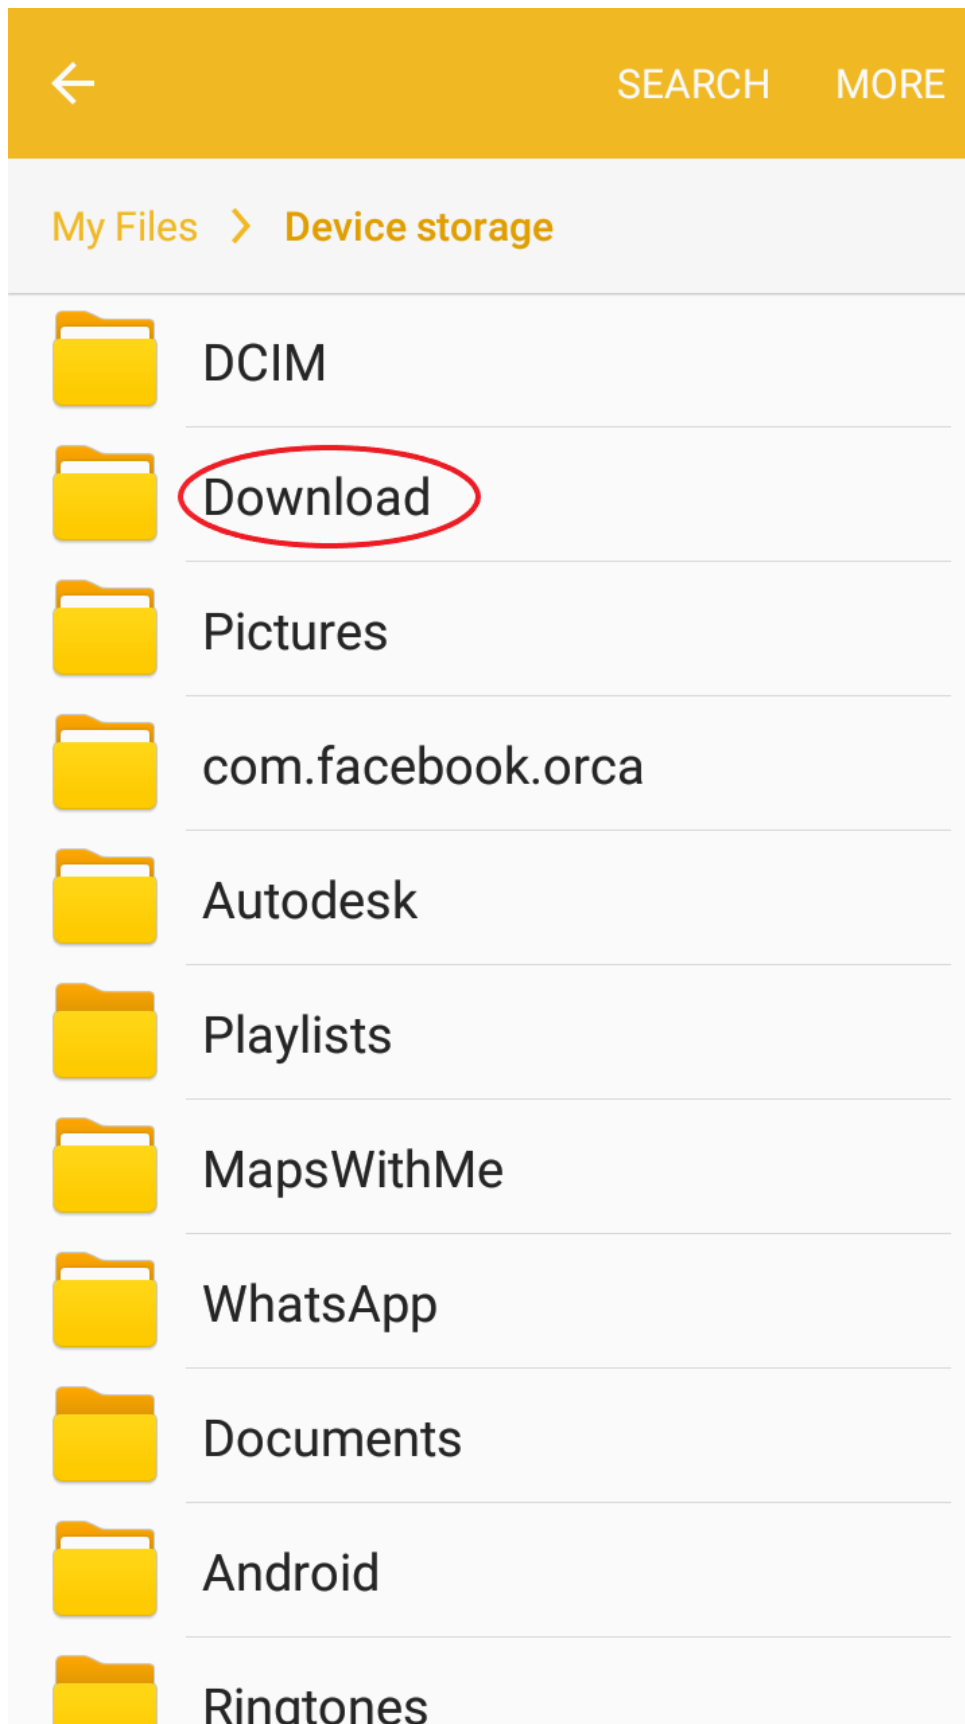

7. Select device storage:

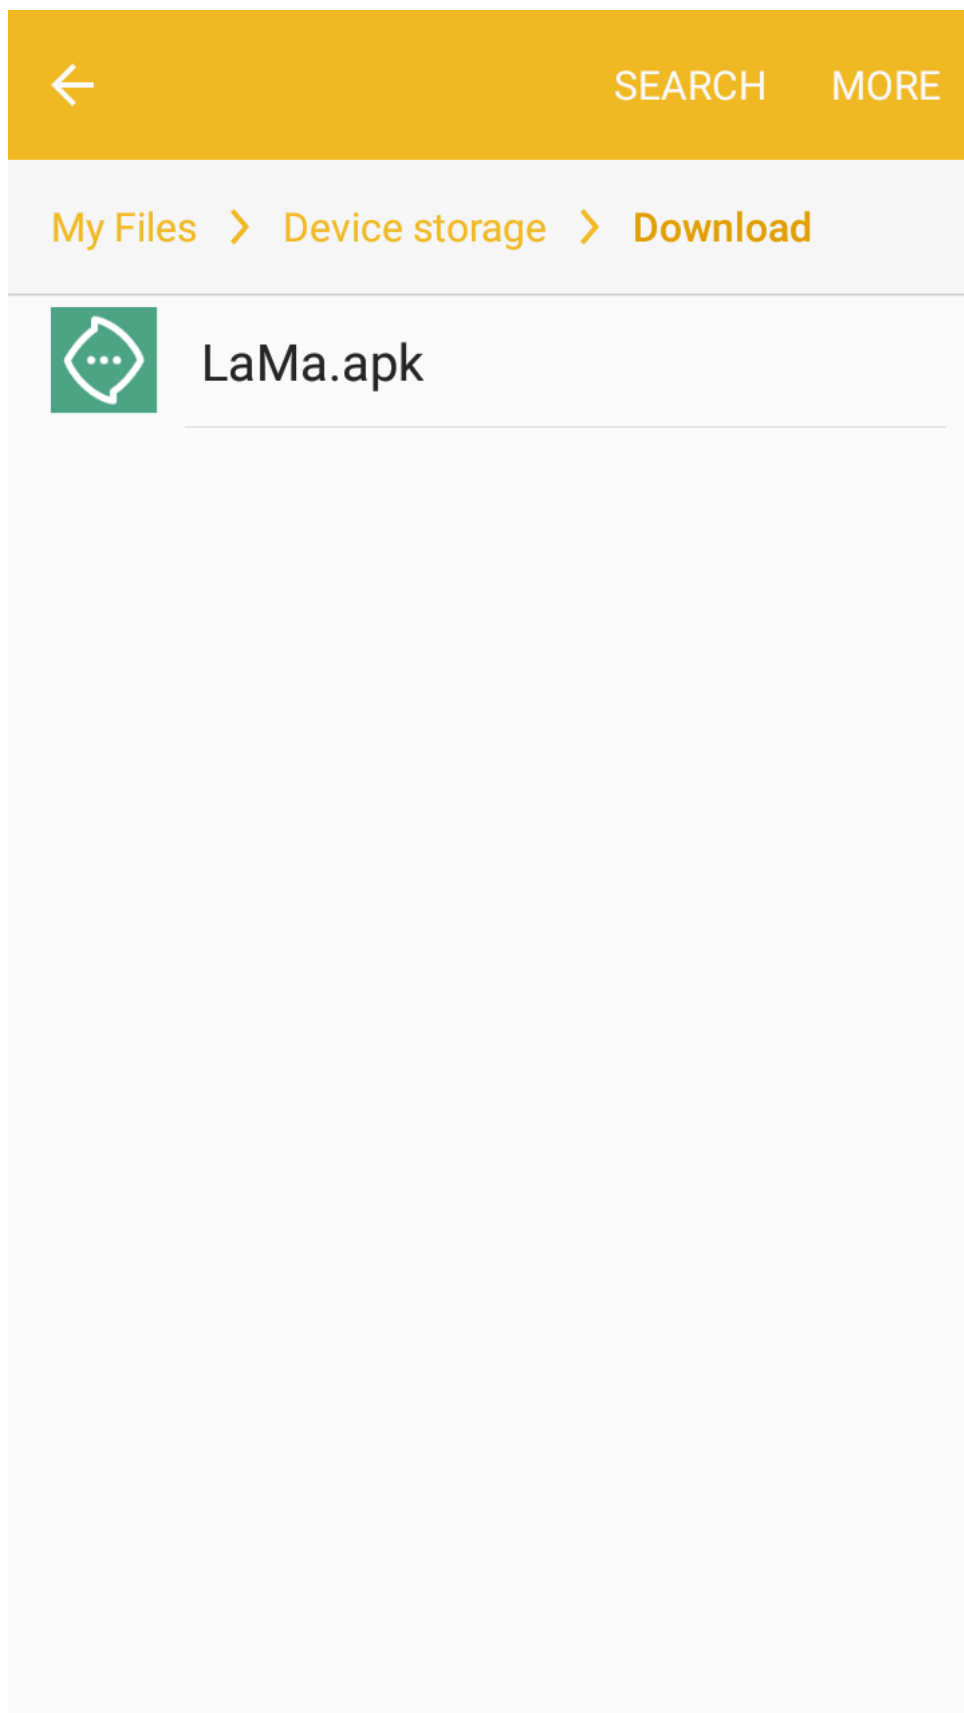

The screenshot shows the 'My Files' application interface. At the top, there is a yellow header bar with the text 'My Files' on the left, and 'SEARCH' and 'MORE' on the right. Below the header, the 'Recent files' section is visible, containing a single file icon for 'LaMa.apk'. The main area of the app displays a list of storage categories, each with a yellow circular icon. The 'Device storage' category is highlighted with a red oval. Below this list, there is a button labeled 'STORAGE USAGE'.

Category	Storage Usage
Device storage	
Download history	43.87 MB
Documents	0.00 B
Images	30.48 MB
Audio	2.84 MB
Videos	5.55 MB

8. Go to your downloads folder:

9. The apk file will be located here. Tap on it to install it:

10. After installation you can open it anytime from here:
